Nonminimally assisted inflation (arXiv:2302.05866): exact evolution, evaluated 10^{-3} e-folds before the end
revision 1cfec7e

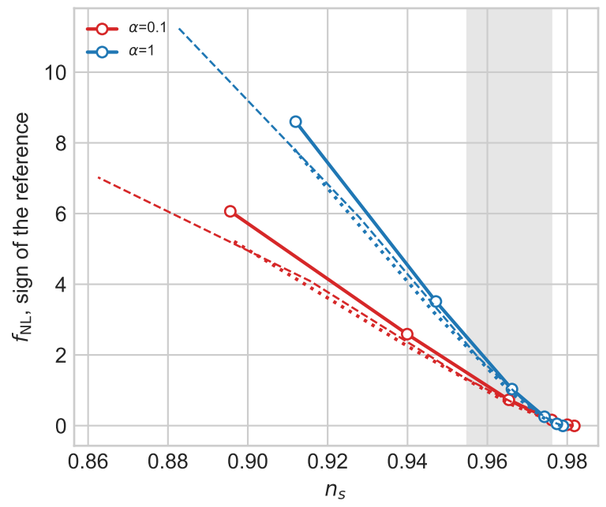

Loop inflation (Class I): pivot to end at $n_s \simeq 0.965$

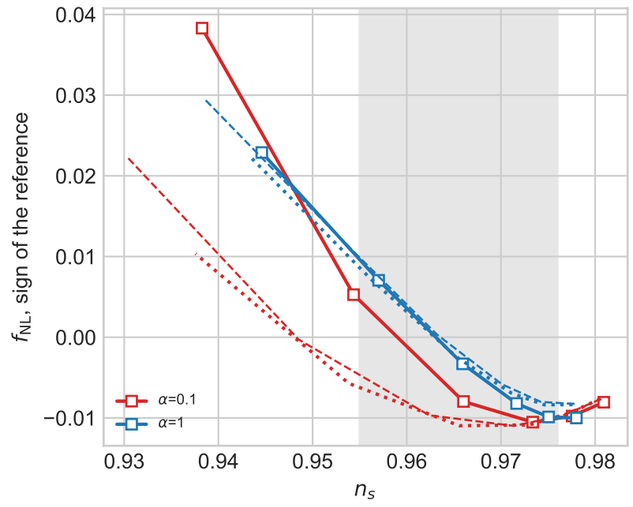

n_s at the end of inflation

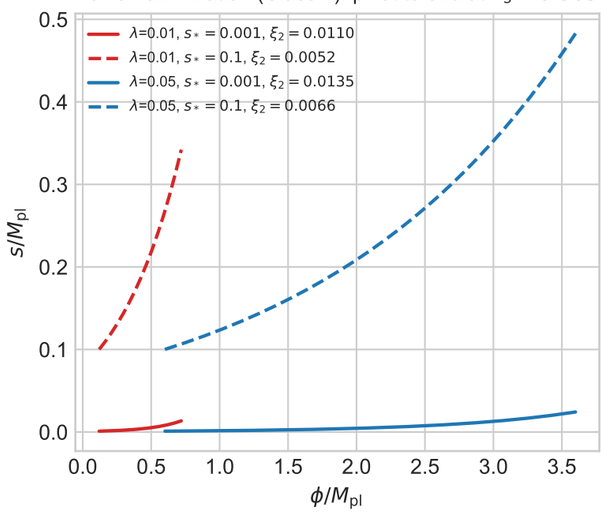

$f_{\rm NL}$, $s_* = 0.001$

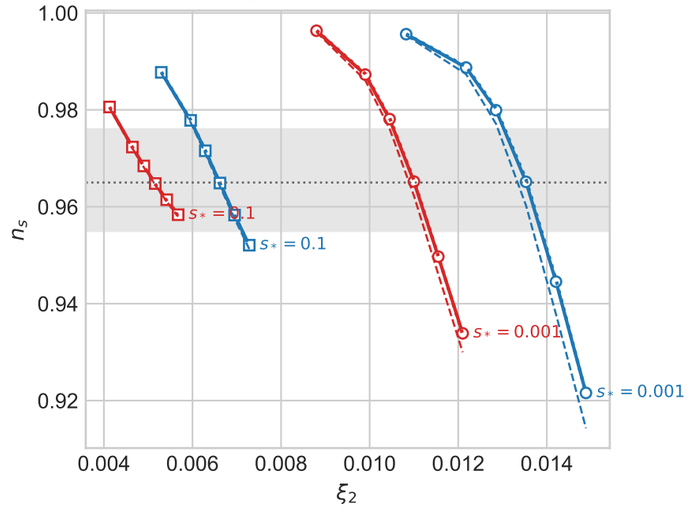

$f_{\rm NL}$, $s_* = 0.1$

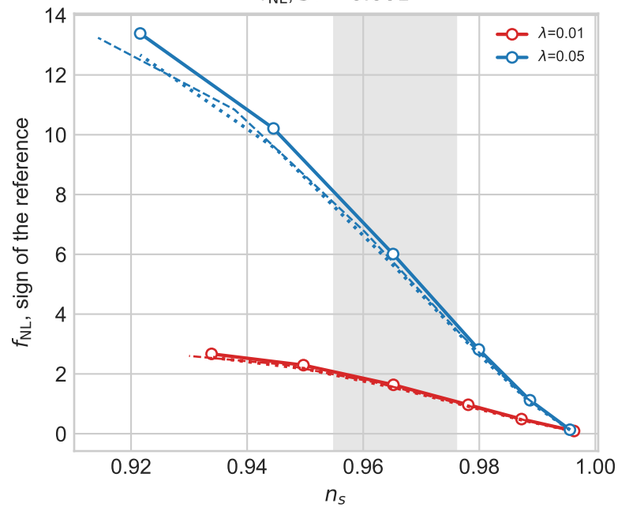

Power-law inflation (Class II): pivot to end at $n_s \simeq 0.965$

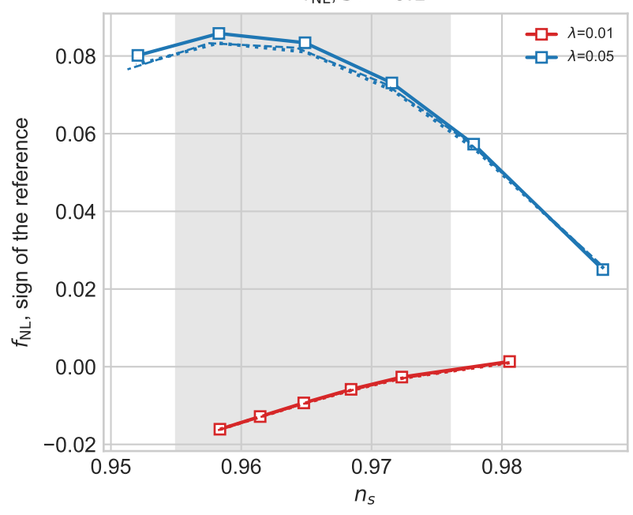

n_s at the end of inflation

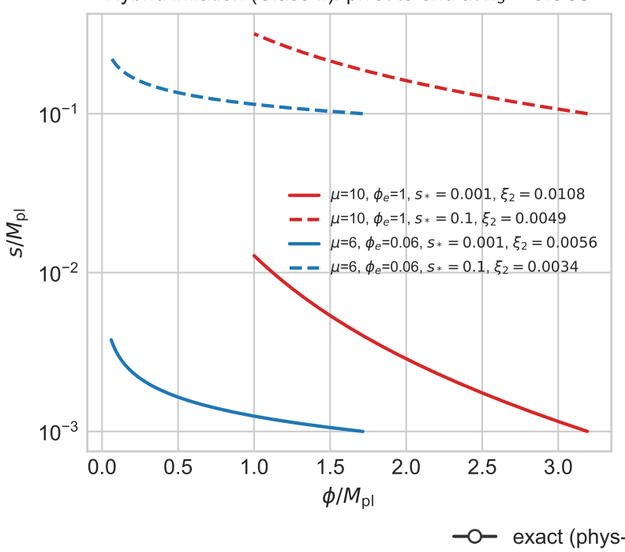

$f_{\rm NL}$, $s_* = 0.001$

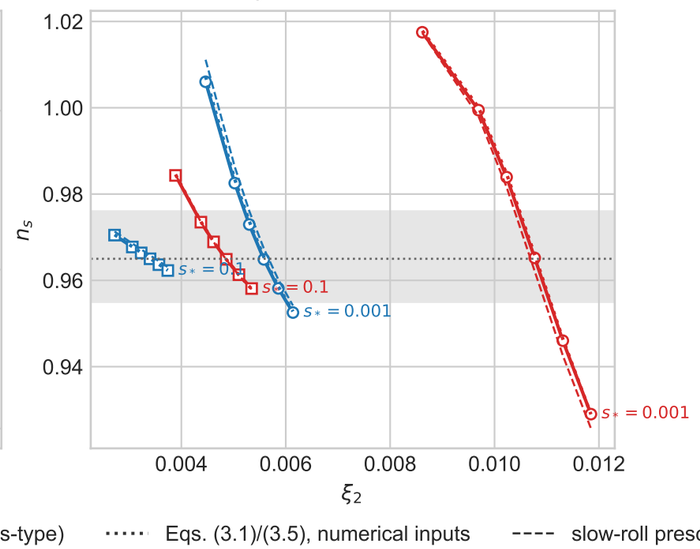

$f_{\rm NL}$, $s_* = 0.1$

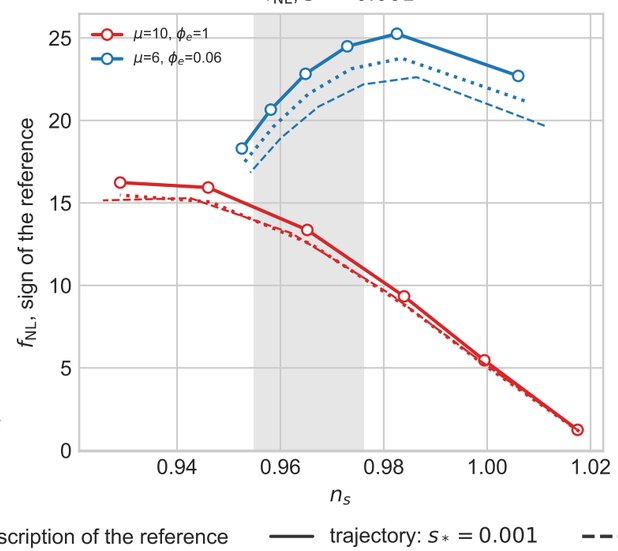

Hybrid inflation (Class II): pivot to end at $n_s \simeq 0.965$

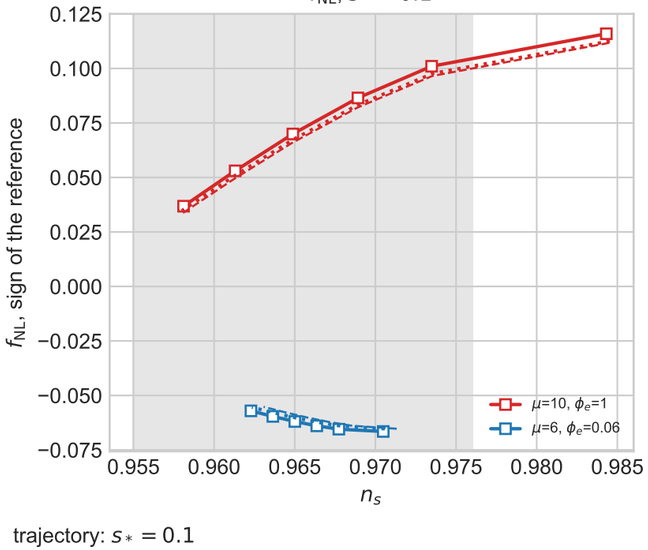

n_s at the end of inflation

$f_{\rm NL}$, $s_* = 0.001$

$f_{\rm NL}$, $s_* = 0.1$

exact (phys-type) ····· Eqs. (3.1)/(3.5), numerical inputs ---- slow-roll prescription of the reference —— trajectory: $s_* = 0.001$ – – – trajectory: $s_* = 0.1$
